UGT-1 Production Costs - Telephoned Advice

25X1A5a1

On Friday, 30 August 1957 [REDACTED] Incorporated, Chicago, Illinois was asked to quote on quantities of 10, 15 and 20 AM/UGT-1 keyer units. The company telephoned the following cost data:

Quantity	Unit Cost	Total Cost	Delivery
10	\$3,275.50	\$32,750.00	4 Months
15	3,049.00	45,735.00	5 Months
20	2,811.00	56,220.00	6 Months

The above quotations are based on units complete with one character wheel (English Language) and no Instruction Manual. A set of character wheels (five foreign languages) was quoted at \$125.00 per set and the Instruction Manual at \$20.00 each. The descending unit cost for the 10, 15 and 20 quantity lots was attributed to simultaneous fabrication of each lot i.e. no early partial delivery. The above costs are also contingent upon the retention of certain SigC temporary tooling.
